

No special tools are required to perform this relearn procedure, however a properly formatted TPMS scan tool may expedite the relearn process.

Auto Relearn Procedure

1. Inflate all tires to pressure listed on the placard.
 - a. *If you have a TPMS scan tool, scanning each sensor before step 2 may expedite the relearn process.*
2. Start the engine.
3. Drive the vehicle above 30mph for 15 minutes.

Stationary Relearn Procedure for Models With STANDARD IGNITION

1. Inflate all tires to pressure listed on vehicle placard.
2. Leave the driver's door open during the relearn procedure.
3. Turn ignition to OFF position and press and release brake pedal.
4. Cycle ignition from the OFF to RUN position 3 times, ending in the RUN position.
5. Press and release brake pedal.
6. Turn ignition to OFF position.
7. Cycle ignition from the OFF to RUN position 3 times, ending in the RUN position.
8. The horn will sound once, and the TPMS telltale will blink once, indicating train mode is initiated. If equipped with a message center, it will display TRAIN LF TIRE.
9. Starting with the LF tire, use your Smart Sensor Tool to scan each sensor in the following order: LF, RF, RR, LR (and full size spare if equipped). The horn will sound once after each sensor has been recognized.
10. After training LR tire, the message center will display TRAINING MODE COMPLETE. If the vehicle is not equipped with the message center display, successful completion can be verified by turning the ignition to the OFF position and not hearing the horn sound. If the horn sounds, then the training procedure must be repeated.
11. Turn ignition to the OFF position.

No special tools are required to perform this relearn procedure, however a properly formatted TPMS scan tool may expedite the relearn process.

Stationary Relearn Procedure for Models With PUSH-BUTTON IGNITION

NOTE: some models require the ignition button to be pressed twice, without pressing the brake, to enter the RUN mode (Ignition ON/Engine OFF). If this is the case, then modify steps 4 and 6 as noted.

1. Inflate all tires to pressure listed on vehicle placard.
2. Leave the driver's door open during the relearn procedure.
3. With the vehicle OFF, press and release the brake pedal.
4. Press the IGNITION BUTTON 5 times (NOTE: 8 times if 2x-to-RUN).
5. Press and release the brake pedal.
6. Press the IGNITION BUTTON 6 times (NOTE: 9 times if 2x-to-RUN).
 - a. Horn will sound once, and the TPMS telltale will blink once, indicating train mode is initiated. If equipped with a message center, it will display TRAIN LF TIRE.
7. Starting with the LF tire, use your Smart Sensor Tool to scan each sensor in the following order: LF, RF, RR, LR (and full size spare if equipped). The horn will sound once after each sensor has been recognized.
8. After training LR tire, the message center will display TRAINING MODE COMPLETE. If the vehicle is not equipped with the message center display, successful completion can be verified by turning the ignition to the OFF position and not hearing the horn sound. If the horn sounds, the the relearn procedure must be repeated.
9. Press the IGNITION BUTTON 1 time back to the off position.
