Tech Support: 877-659-8767
3. After creating/logging in to your account, click the download button in the center of your dashboard and the 31 Pro Updater will start downloading.
If your browser says "Make sure you trust this program before downloading," click the following options in order:

1. Three Dots (...)	2. Keep	3. More Options	4. Keep Anyway
---------------------	---------	-----------------	----------------

4. Once the download is complete, double-click the file to open it, click "Yes" to all prompts, then follow the steps of the Install Wizard, including accepting the Terms and Conditions.
5. After the Install Wizard finishes installation, the following icon will appear on your desktop: Double-click it to open the program and it will prompt you to update. Click "Yes" and let the program makes changes to your PC.

Pro+ Updater.exe
6. Power on your Tool and connect it to your computer's USB port using the cable included with the Tool.
7. Once the program states the following in the Message box: "Do you want to update to version 5.3?" Click the "Update" button in the top left of the program and wait for the Tool to say it can be disconnected from the USB port.
8. Once the Tool is disconnected, it will power down, meaning the update is complete. To test if the update was successful, power it back on and the boot screen should state the Tool is version 5.3.
9. (Optional): If you have an OBD II Module for your Pro+ Tool, connect it to your computer's USB port using the same cable, and click the "Update" button to update its software.
